<sup>1</sup> See "Peak Kilowatt" in Glossary.

<sup>2</sup> Grid-interactive means connection to the electrical distribution system; remote means electricity for general use that does not interact with the electrical distribution system, such as at an isolated residential site or mobile home. The other end uses in this table also include electricity generation, but only for the specific use cited.

<sup>3</sup> Through 2006, data are for the commercial sector, excluding government, which is included in "Government." Beginning in 2007, data are for the commercial sector, including government.

<sup>4</sup> Through 2006, data are for the industrial sector and independent power producers. Beginning in 2007, data are for the industrial sector only; independent power producers are included in "Electric Power."

<sup>5</sup> Through 2006, data are for electric utilities only; independent power producers are included in "Industrial." Beginning in 2007, data are for electric utilities and independent power producers.

<sup>6</sup> Through 2006, data are for shipments for specialty purposes such as research.

<sup>7</sup> "Original Equipment Manufacturers" are non-photovoltaic manufacturers that combine photovoltaic

technology into existing or newly developed product lines.

<sup>8</sup> Through 2006, includes applications such as cooking food, desalinization, and distilling.

<sup>9</sup> Through 2006, data are for domestic and export shipments, and may include imports that subsequently were shipped to domestic or foreign customers. Beginning in 2007, data are for domestic shipments only.

<sup>10</sup> Beginning in 2007, the government sector is included in "Commercial."

-- = Not applicable.

Note: Totals may not equal sum of components due to independent rounding.
